FMS-ACES INDUSTRY DAY 2023

GROUND RULES

- This brief is marked “Distribution Statement A. Approved for Public Release, Distribution Unlimited.”
- The Government will not publish Industry-Proprietary questions/comments or their responses.
- The Government intends to publish Industry-General frequently asked questions (FAQs) with Government-prepared responses.
- Nothing presented in this Industry Day commits the U.S. Army to any acquisition approach, agreement or contract.
- Any future published opportunity will take precedence over information presented today or in response to questions.
- The “final” version of these slides and a list of the registered companies will be posted to www.SAM.gov
- The Government is livestreaming this Industry Day event, and a video of the event will be published on YouTube at <https://www.youtube.com/user/PEOEIS>

OPENING REMARKS

Mr. Patrick H. Mason
Deputy Assistant Secretary of the
Army for Defense Exports &
Cooperation (DASA DE&C)

Mr. William J. Hepworth
Deputy Program Executive Officer
Enterprise Information Systems
(PEO EIS)

Mr. Kevin T. Curry
Project Manager
Defense Integrated Business
Systems (DIBS)

DASA (DE&C) REMARKS

Mr. Patrick Mason

Mr. Patrick H. Mason

Deputy Assistant Secretary of the
Army for Defense Exports &
Cooperation (DASA DE&C)

DEPUTY PEO REMARKS

Mr. Bill Hepworth

Agile Transformation

- Organizational change
- AID (agile acquisition and contracting); CIO
- Shift SETA to tech services; SAFe model

Expectations of Industry

- CI/CD pipelines
- Rapid delivery
- User Interaction
- OEM engagement
- Demonstrated experience for like systems
- Readiness and metrics

How FMS-ACES supports ASAALT

- Data Mesh/UDRA

Mr. William J. Hepworth

Deputy Program Executive Officer
Enterprise Information Systems
(PEO EIS)

PM DIBS REMARKS

Mr. Kevin Curry

- History with FMS-ACES
- FMS-ACES Modernization
- Software Acquisition Pathway Benefits
- Key Goal of Industry Day

Mr. Kevin T. Curry
Project Manager
Defense Integrated Business
Systems (DIBS)

FMS-ACES INDUSTRY DAY 2023

FMS-ACES OVERVIEW

- Problems We Are Attacking
- FMS-ACES Stakeholders
- FMS-ACES Current vs. Desired State
- Mission and Vision
- Capability Areas
- System High-Level Architecture
- Software Acquisition Pathway
- Agile Approach

Ms. Kelly A. Rutherford
Product Lead
FMS-ACES

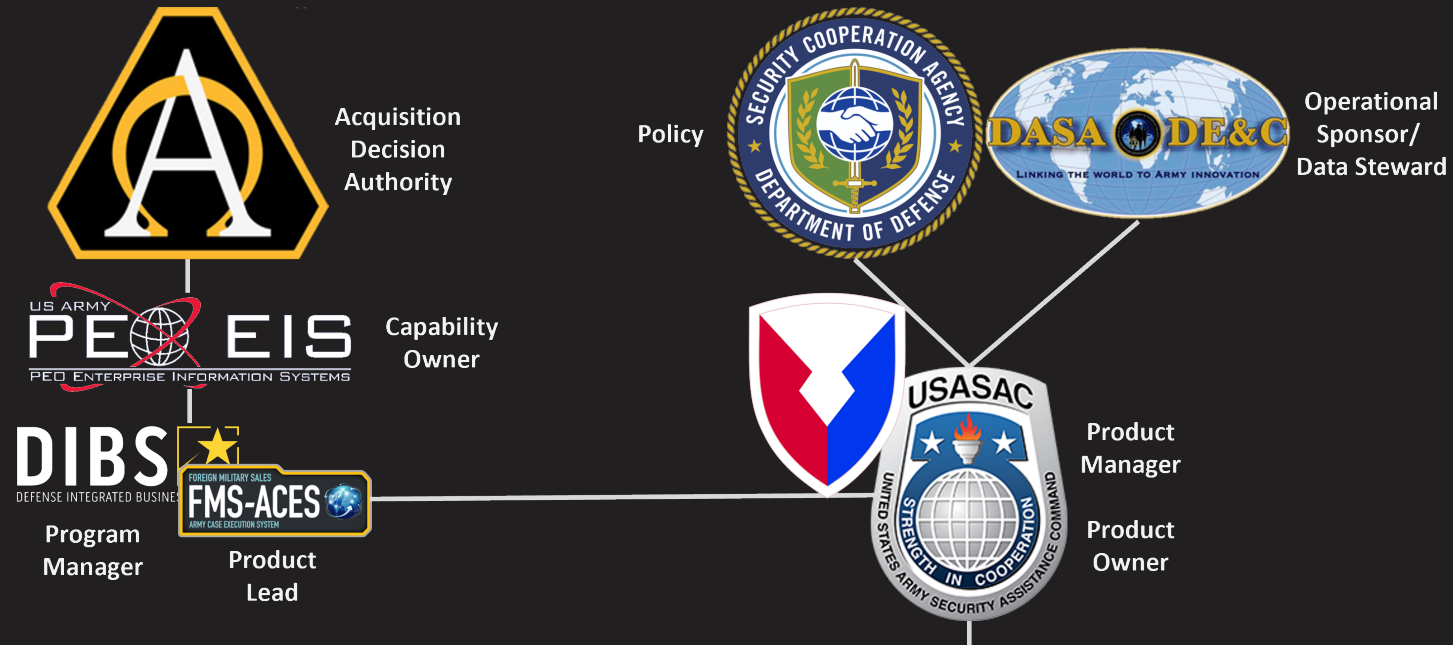

Ms. Amy J. Young
Product Owner
U.S. Army Security
Assistance Command
(USASAC)

PROBLEMS WE ARE ATTACKING

(MODERNIZING THE ARMY SECURITY ASSISTANCE ENTERPRISE)

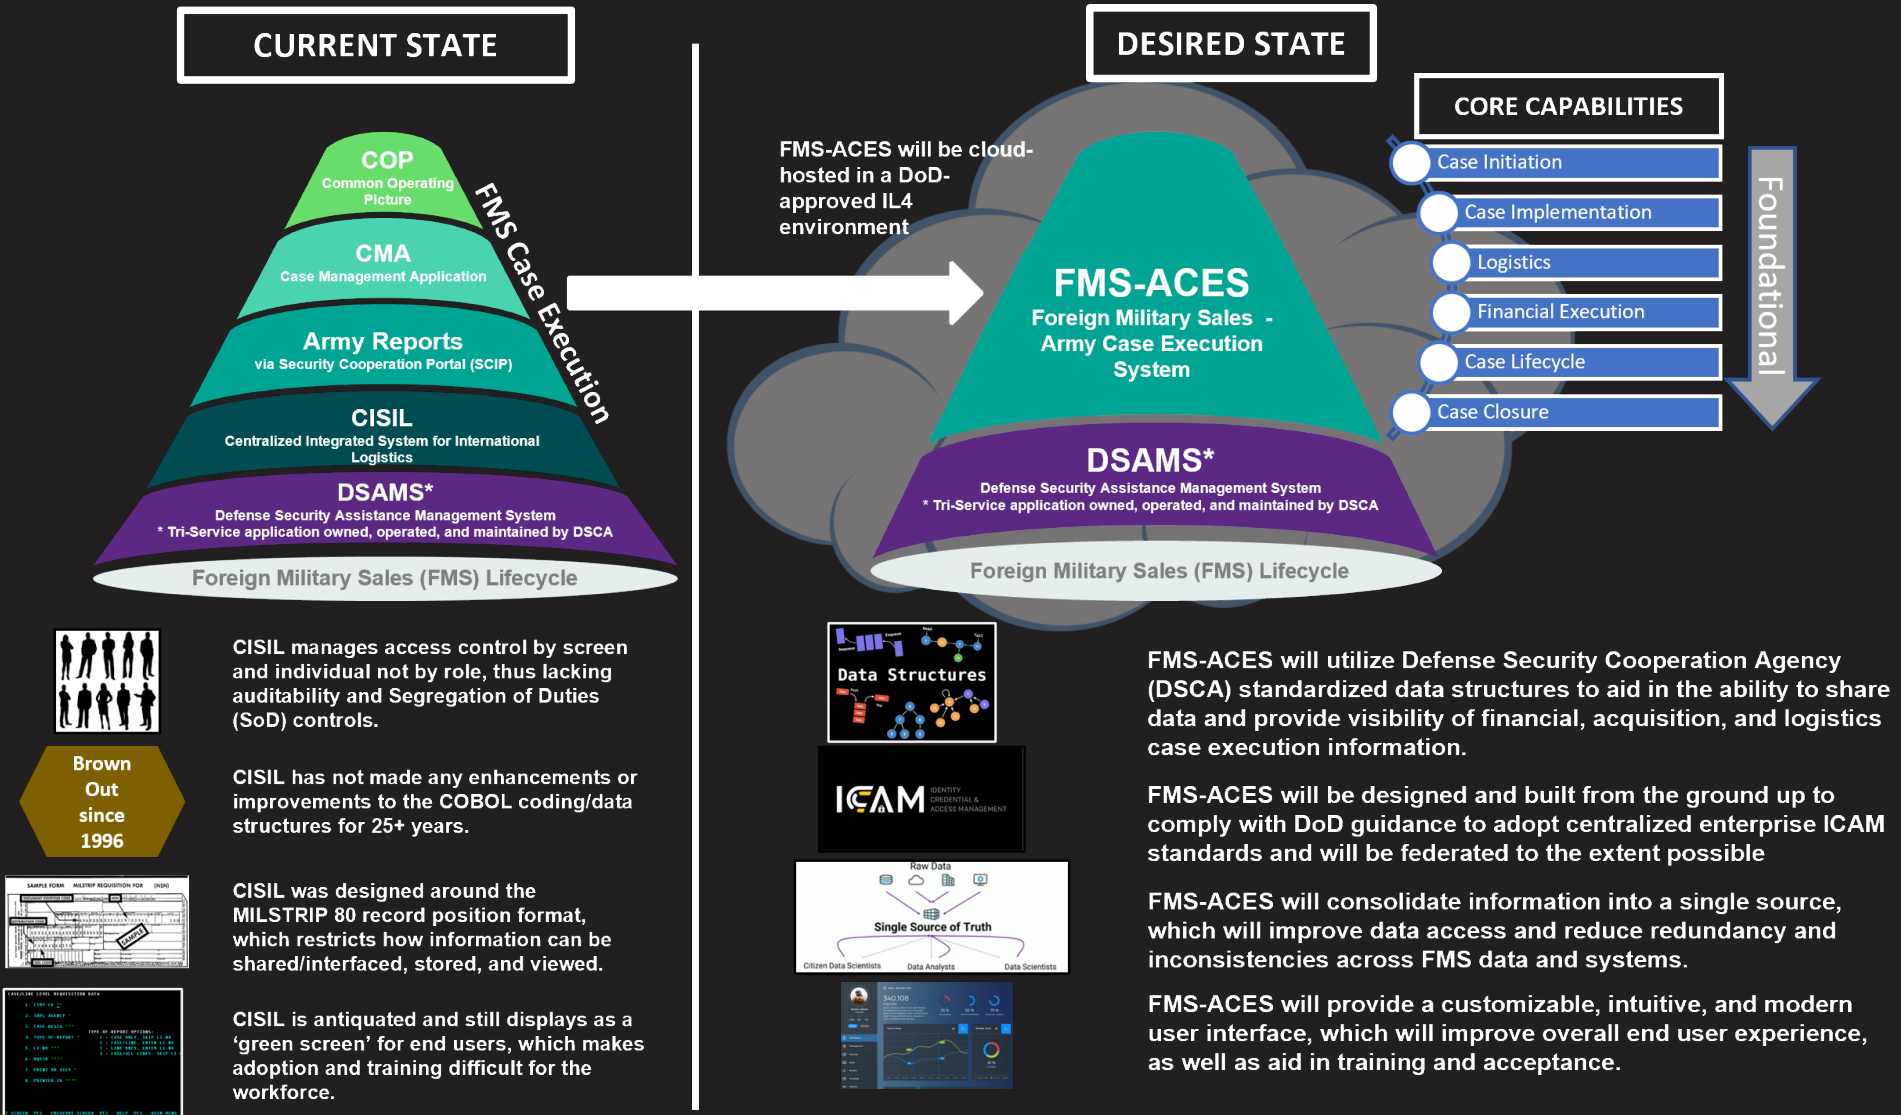

FMS-ACES STAKEHOLDER COMMUNITY

Key Stakeholders / User Community		
<p>Life Cycle Management Commands (LCMCs)</p> <p>TACOM AMCOM CECOM</p> <p>JMC MEDCOM/USAMMA</p>	<p>Other Implementing Agencies (IA)</p> <p>TRADOC</p> <p>USACE</p>	<p>Minor Implementing Agencies (IA)</p> <p>DCMA DISA DLA DTRA MDA NGA NSA</p>

FMS-ACES CURRENT VS DESIRED STATE

CAPABILITY AREAS

USASAC's capability needs have been categorized into eight (8) capability areas that encompass Army FMS, Security Cooperation, DSCA CEMI, and DoD security requirements. The six (6) core capability areas defined below make up operational capability needs. The two (2) remaining capability areas are:

- Foundational - The Foundational capability area consists of common processes that span multiple capability areas
- Non-Functional (Technical) - The Non-Functional (Technical Requirements) Capability Area consists of the system architecture, design, technology stack, and implementation of United States Department of the Army (DA), DoD, and National Institute of Standards and Technology (NIST) standards that allow a system to operate securely and reliably on the DoD Non-classified Internet Protocol (IP) Router Network (NIPRNet) while meeting audit standards.

Case Initiation	Case Implementation	Logistics	Financial Execution	Case Lifecycle	Case Closure	
<ol style="list-style-type: none"> 1. Receive and Review Proposed LOA for Execution 2. Create FMS Case Master Record 3. Update FMS Case Master Record to Offered Case Status 	<ol style="list-style-type: none"> 1. Receive Documentation and Authority for Implementation 2. Perform Emergency Implementation 3. Forced Manual FMS Case Implementation 4. Update Case Master Record [ILIF] to Implemented 5. Perform Logistical Case Review for Execution 	<ol style="list-style-type: none"> 1. Initiate Materiel Requisitions 2. Initiate Service Requisitions – Funding or Service Line 3. Process FMSO2 Requisitions 4. Create and Manage Concurrent Spare Parts Packages 5. Publication Data Management Process 6. Process Customer Publication Request -- Defined Line 7. Process Customer Publications Requests - - Blanket Order Resupply 8. Process Customer Publications Requests - - Blanket Order Initial Distribution 9. Manage Customer Publication Accounts 10. Assign Fund Center 11. Manage Requisition Supply Status 	<ol style="list-style-type: none"> 12. Manage Requisition Shipment Status 13. Manage Requisition Modifications 14. Manage Requisition Cancelations 15. Initiate Special Process Requisitions [SNAP, R&R, FSSP] Renegotiate Cooperative Logistics Supply Support Arrangement (CLSSA) Program 16. Prepare Acquisition Package for Non -Standard Services and Products 17. Receive - Adjudicate Supply Discrepancy Reports (SDR) 18. Supply Discrepancy Write-Offs 19. Execute Presidential Drawdowns – Materiel 20. Manage System Support Buyout (SSBO) Process 	<ol style="list-style-type: none"> 1. Provide FMS Line Funding 2. Provide Funding for Emergency Orders 3. Provide FMS Requisition Funding 4. Receive and Manage FMS Interfund Billing Process 5. Execute Customer Billing 6. Receive and Manage FMS non-Interfund Billing Process 	<ol style="list-style-type: none"> 1. Execute Case Financial Evaluation 2. Execute Case Logistical Evaluation 3. Execute Case Closure Evaluation 4. Create and Maintain the Case Master Plan 5. Conduct Case Lifecycle Management Reviews 6. Perform Centralized Error Correction (VVV) Activities 7. Delivery Reporting 	<ol style="list-style-type: none"> 1. Manage Line Certification Process 2. Manage Case Certification Process 3. Re-Open Closed Case - Accelerated Case Closure Participant (ACCP) Process 4. Reopen Closed Case - Non-Accelerated Case Closure Participant (Non-ACCP) 5. Manage Line Re-certification Process 6. Process Unliquidated Obligations (ULO) Refunds on Interim Closed Cases 7. Cancel Case Certification Process

FMS-ACES MISSION - VISION

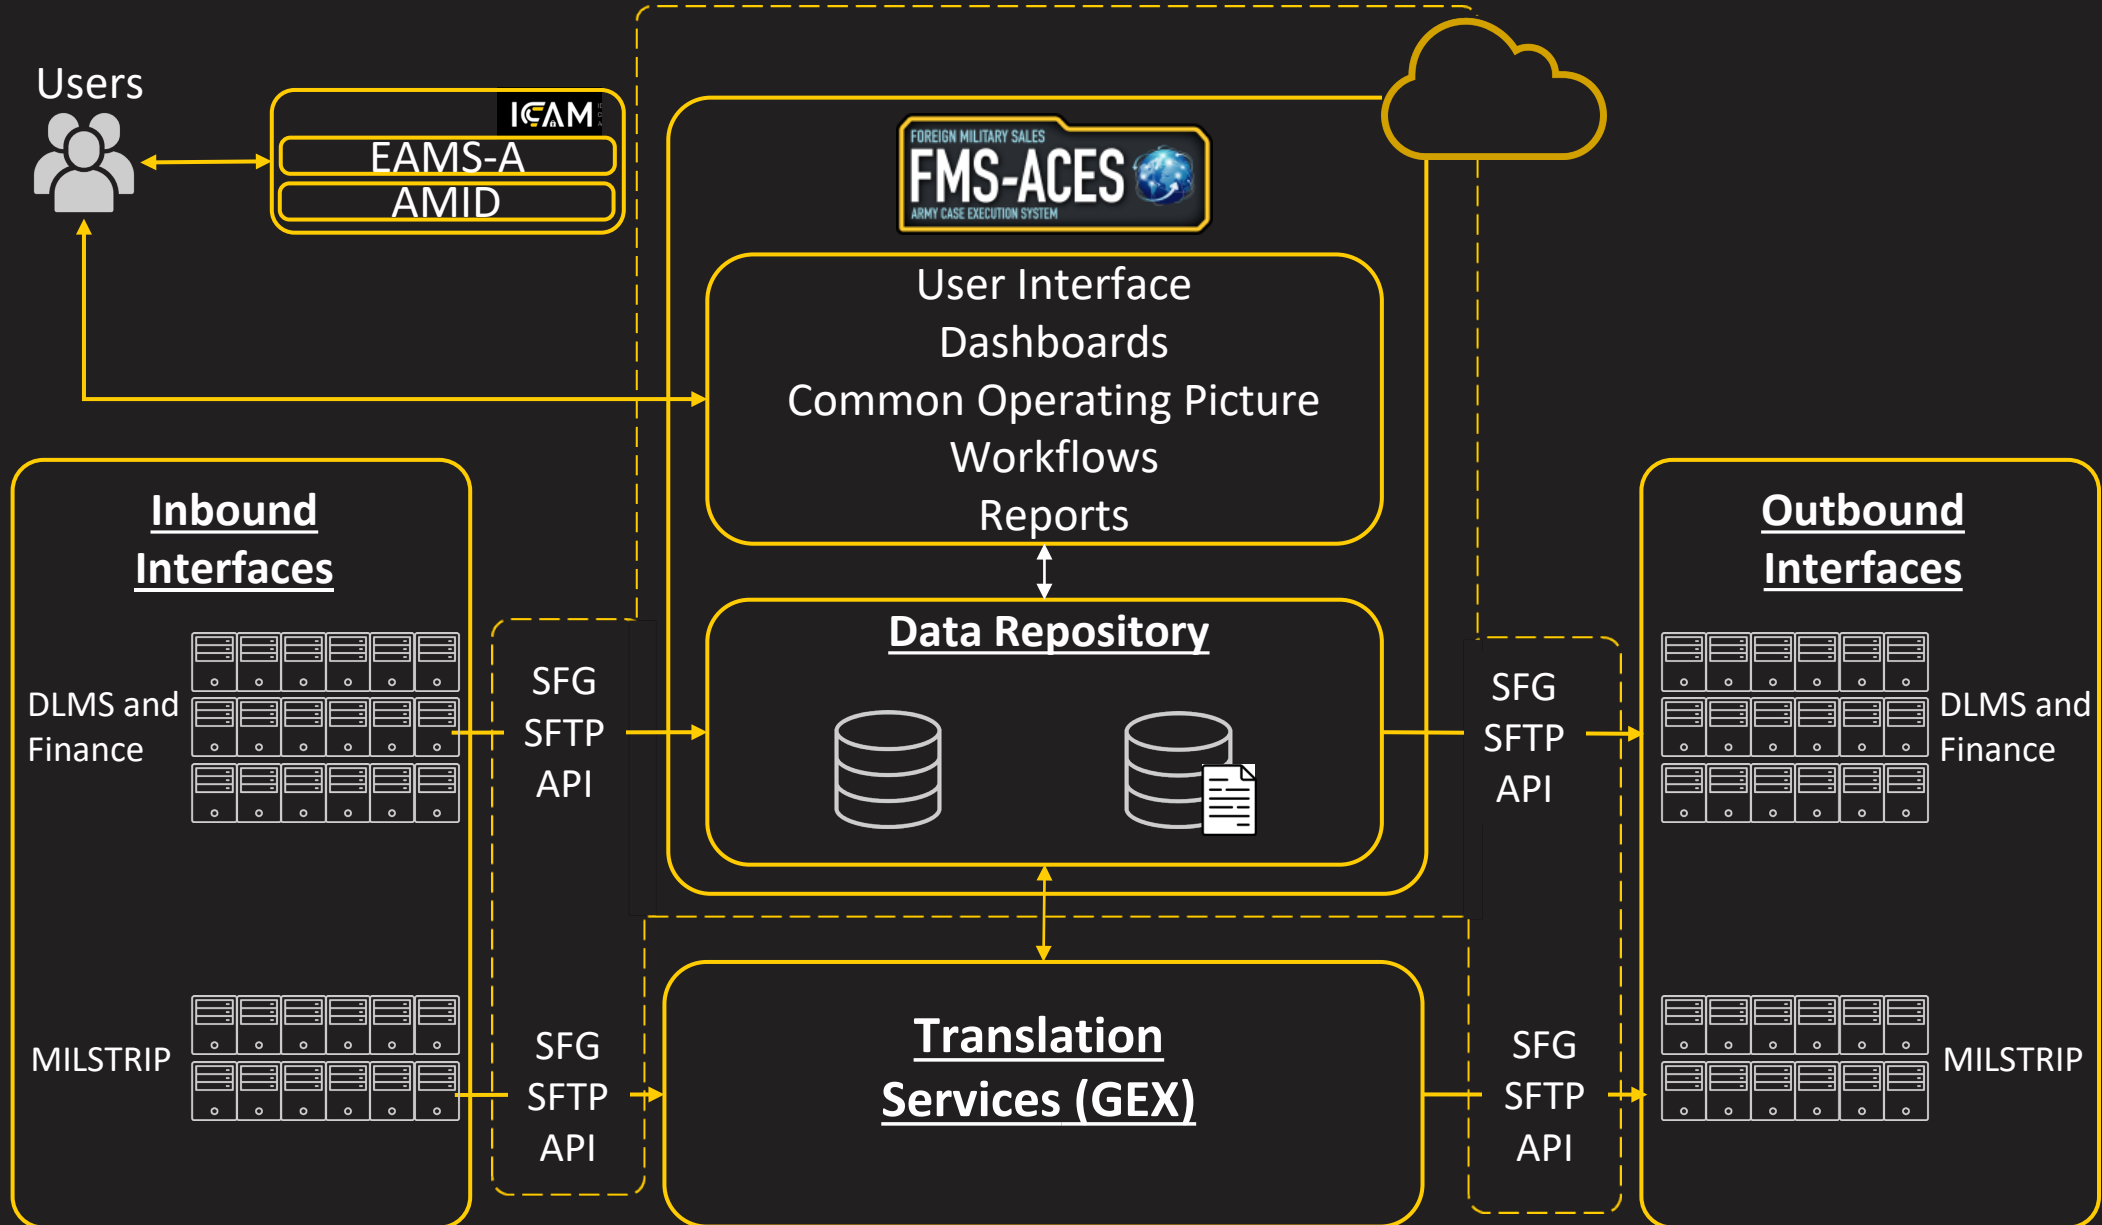

MISSION

Deploy an integrated solution that meets the needs for foreign military sales case execution through innovative capabilities, automated interfaces and enhanced reporting and data analytics.

VISION

FMS-ACES will be the Army's modernized solution to provide the security cooperation community with the capability to manage FMS cases from end-to-end on a cloud-based platform at the speed of relevance with improved data quality and visibility, integrating Army and Department of Defense (DoD)-disparate systems while using non-linear development methods.

FMS-ACES HIGH-LEVEL ARCHITECTURE

FMS-ACES AND THE SOFTWARE ACQUISITION PATHWAY (DoDI 5000.87)

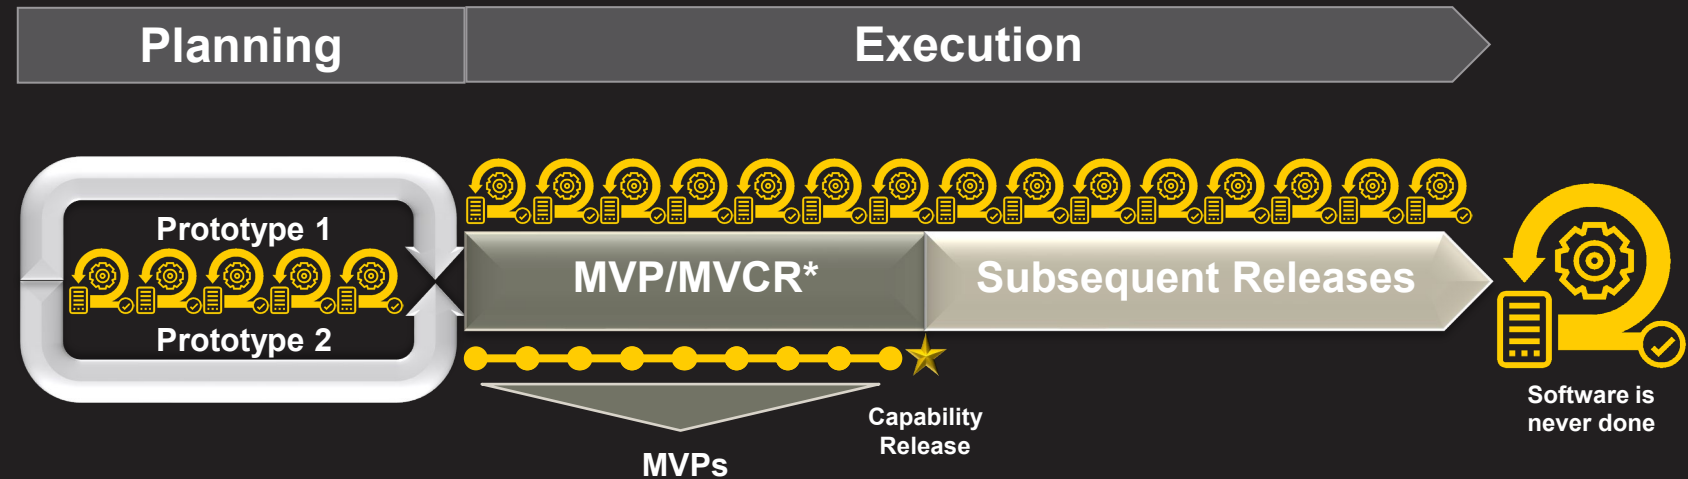

BENEFITS

Integrates modern software development practices

Emphasizes active user engagement and teamwork

Working software is prioritized based on operational community needs and delivered rapidly

Responsive to change

*Note: MVP/MVCR represents 1st year execution to a capability release per 5000.87. MVCR/Capability Release can be reached at any point within the first year of execution.

FMS-ACES AGILE APPROACH

OBJECTIVE

To create a partnership between the Government and Industry through collaboration and shared responsibilities

PROCESS

FMS-ACES aligns with the Army's Digital Transformation initiatives and DoDI 5000.87 (Software Acquisition Pathway) which will accelerate the timeline for developing and fielding software capabilities

OUTCOME

Increased speed and agility, improved customer satisfaction, enhanced user engagement and morale, increased collaboration and teamwork, and reduced costs and risk

SOLICITATION APPROACH

How did we get here?

- **The FMS-ACES program was categorized as a Defense Business System (DBS)**
- **Title 22 FMS admin funded**
- **Special approval was provided by the Assistant Secretary of the Army (Acquisition, Logistics and Technology) to use the Software Acquisition Pathway 5000.87 to enable iterative and rapid software delivery using an agile approach**
- **Market research was performed to understand potential solution approaches to meeting the functional and technical requirements, to identify trends or modern concepts and identify capabilities and concerns for hosting a system in a government cloud environment**
- **Request for Information was conducted in the Fall 2022**
- **Industry Meetings were held in the Summer of 2023**
- **FMS-ACES will pursue multiple prototype agreements via Other Transaction Agreement for initial capability demonstration to promote innovation and reduce Acquisition Lead Time**

OTHER TRANSACTION AUTHORITY

This action will be carried out in accordance with U.S.C. 4022(d). Further, §4022(d)(1) requires:

“The Secretary of Defense shall ensure that no official of an agency enters into a transaction (other than a contract, grant, or cooperative agreement) for a prototype project under the authority of this section unless one of the following conditions is met:

- A. There is at least one nontraditional defense contractor or nonprofit research institution participating to a significant extent in the prototype project.**
- B. All significant participants in the transaction other than the Federal Government are small business or nontraditional defense contractors.**
- C. At least one-third of the total cost of the prototype project is to be paid out of funds provided by parties to the transaction other than the Federal Government.**
- D. The senior procurement executive for the agency determines in writing that exceptional circumstances justify the use of a transaction that provides for innovative business arrangements or structures that would not be feasible or appropriate under a contract or would provide an opportunity to expand the defense supply base in a manner that would not be practical or feasible under a contract.”**

FMS-ACES STRATEGIC PRODUCT ROADMAP

PLACE OF PERFORMANCE

APPROACH

- The place of performance will be a mixture of virtual (leveraging the Government's Office 365 and CReATE tools), Contractor facility, and Government facilities as needed, to include operational community facilities around New Cumberland, PA and the program office in Crystal City, VA.

DEPENDENCIES

- Beginning with step 5, all personnel associated with the upward invited offeror(s) must be eligible to obtain a Common Access Card (CAC) to access the Office 365 and CReATE tools and perform the associated step.

SUMMARY

FMS-ACES

01

Foreign Military Sales - Army Case Execution System (FMS-ACES) will be the modernized, cloud-native, Army FMS management, tracking, and reporting system that subsumes CISIL, CMA and Army Reports capabilities, while implementing a DoD enterprise approach and achieve data standardization that efficiently and effectively supports FMS programs and the ASAE at large

REQUIREMENTS

02

Executing under DoD 5000.87 SWP, the FMS-ACES contract approach is to pursue two separate Other Transaction Agreement (OTA) Prototype Agreements from a minimum of two offerors. FMS-ACES is pursuing requirements in an Agile development methodology for the software development

PROCUREMENT

03

FMS-ACES program, will award two OT Prototype Agreements to achieve Minimum Viable Product (MVP) targets. Upon completion of Step 5, a successful competitive prototype, the Army will award a follow-on production agreement to one offeror with the best prototype solution to continue incorporating capabilities

CAPABILITIES

04

FMS-ACES' goal is to acquire a Solution Provider to meet or exceed the requirement to deliver operational software Minimal Viable Capability Release (MVCR) and subsequent capability releases.

INDUSTRY NEXT STEPS

- **The FMS-ACES Draft Solicitation Package was posted to www.Sam.gov on 25 August 2023**
- **Requesting questions and/or comments regarding the draft solicitation files, these slides or any posted files to be submitted in writing through email by 8 September to:**
fmsaces_industryday@army.mil

Questions from Government to Industry: (respond to email provided above)

1. Requesting immediate feedback on any of the Solicitation documentation: Statement of Objectives, Announcement and Instructions
2. From Step 1 to Step 2, from an Industry perspective, what is a reasonable amount of time to be able to provide a product demonstration from receiving an upward invite?
3. Does the Cost Template allow for being able to provide cost measures to reflect buying capacity? (Executing Agile)
4. For the competitive prototype phase, please provide a rough estimate for that phase.

QUESTIONS & ANSWERS
